OUR PRODUCTS

ABET LAMINATI HIGH PRESSURE LAMINATE

Our High Pressure Laminates (HPL) comes from the leading European manufacturer ABET Laminati. With over 350 + solid colours, textures and patterns, woodgrains and metals create a design led palette to enhances any interior project. HPL is available pressed onto MR MDF with matching ABS edge tape or White Birch Ply. Standard sheet size is 3050x1300x0.9mm. Most of our standard range comes with a Group 1 fire rating.

ANTI-FINGERPRINT HIGH PRESSURE LAMINATE

HPL with an extra-matte, smooth and velvety texture. Highly resistant to scratches and heat as well as being anti-fingerprint using cutting edge technology. Also available in 2.5-13mm SURPAC compact laminate.

LAMISHIELD ANTIMICROBIAL LAMINATE

Lamishield by ABET Laminati is an antibacterial High Pressure Laminate (HPL) that reduces the risks of infections and illness related cross contamination. Thanks to the BioCote® silver-ion technology fully incorporated into the decorative layer, Lamishield reduces the level of bacteria on its surface by up to 99.9%. Available in a select range of colours.

MAGNETICO & WRITABLE SURFACES

Magnetico White 406 Lucida can adapt between an easy-to-clean white board, to a magnetic surface, to a projection screen, making it ideal for multi-functional spaces. Magnetico is also available in a Black 421 Soft finish for traditional chalk board and magnetic applications. Writable Surfaces are an extension of the Magnetico range with the entire collection of high gloss HR-LAQ laminates. The additional 20+ colours allow unlimited options for versatility and creativity in any space. The high gloss finish creates a clean crisp surface that is easily dry erased for multiple marker use.

HOLZ IN FORM

Embossed and textured timber panels for architectural applications. Various 'structures' available in both timber veneer or lacquered finishes.

SURPAC THE ALTERNATIVE SUBSTRATE

SURPAC is a self-supporting decorative substrate that offers excellent mechanical and physical properties. Multiple thicknesses available from 2.5-13mm, stocked and extended colour ranges, standard and labgrade. Multiple sheet sizes available for excellent optimisation and minimal waste. Standard white sheet available for fabrication testing for machining and fixing.

SURPLY BIRCH PLYWOOD

SURPLY is a range of engineered plywood products available in a variety of sheet sizes and wide range of thicknesses. SURPLY is lighter in weight, providing ease of handling and fabrication allowing for design flexibility. SURPLY is available pressed with any of the ABET Laminati HPL.
