PARTITIONING

STRATIFICATO

BY | ABET LAMINATI 

Unlimited selection

Stratificato is resistant to impact, wear and moisture making it the ideal material for partitioning. Along with its excellent hygienic properties, Stratificato has the largest colour range on the market giving you more flexibility in your design.

Stratificato is manufactured in a thickness of 13mm and sheet size of 4200x1860 or 4200x1610 to create the best optimisation for a 2100 high partition. This creates minimal waste, provides cost saving on material and increases privacy.

The properties of Stratificato make it ideal for other applications that include lockers, wall panelling, furniture and joinery. For these, Stratificato can be manufactured in various sheet sizes and thicknesses ranging from 2.5mm - 13mm creating versatility in machining and yield.

Complete your design with complementing and matching High Pressure Laminates from the entire ABET Laminati collection to bring your project to life.

FEATURES

Extensive colour range

Self-supporting properties

Impact resistant

Environmentally friendly

Mechanically sturdy

High resistance to water and steam

Easy to clean

Excellent hygienic properties

Wide range of colours and design

10 year warranty

SYSTEM BENEFITS

■ REDUCE WASTE

Ever considered where the off cuts of your material go? With so much material ending up in skip bins and eventually landfill, its time to pay more attention to the scrap heap. Stratificato comes in a sheet size of 4200, providing a partitioning height of 2100. This means there is no material wasted.

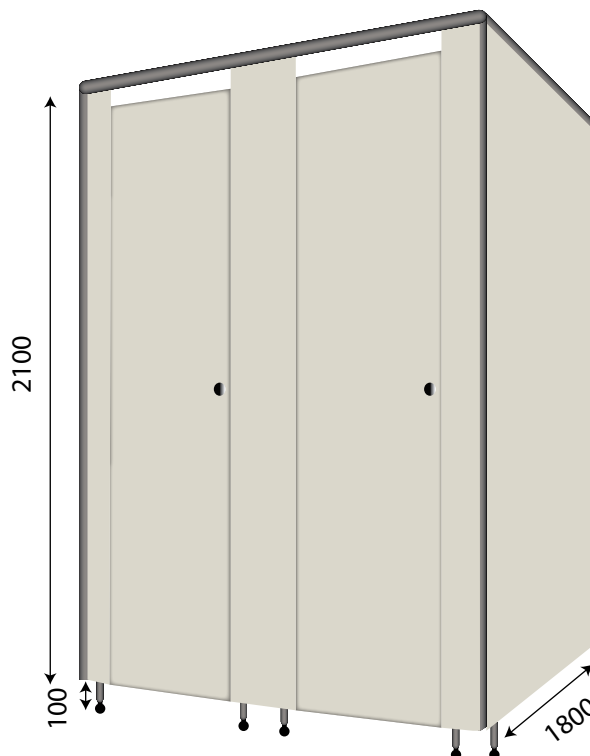

■ COST EFFECTIVE

Utilising manufacturing capabilities to produce a sheet that allows minimal offcuts during fabrication contributes to a significant cost saving. You are simply not paying for material that you throw away.

■ PRIVACY

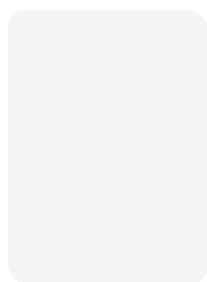

Traditional toilet and shower partitioning height is 1800mm high, making the gap between the floor and the bottom of the stall 300mm. By using Stratificato, reduces the gap to 100mm, which meets the demand of both privacy and safety in bathrooms for a wide range of projects.
