PARTITIONING

Surface Squared SURPAC is manufactured in a thickness of 13mm in multiple sheet sizes to create the best optimisation for a 2100 high partitions in Privacy Plus, or floor to ceiling partitions and doors in Privacy Max. This allows minimal waste, provides cost saving on material and increases privacy.

FEATURES

Extensive colour range

Impact resistant

Self-supporting properties

Environmentally friendly

Easy to clean

Mechanically sturdy

Excellent hygienic properties

High resistance to water and steam

Fire rated

10 year warranty

The properties of Surpac make it ideal for the following projects:

- Education.
- Sports Centres and Stadiums.
- Office and towers.
- Hospitality.
- End of Trip Facilities.
- Hospital and Medical facilities.
- Recreational and public facilities.

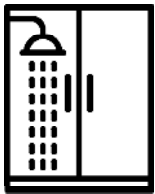

SYSTEM BENEFITS

■ REDUCE WASTE

Ever considered where the off cuts of your material go? With so much material ending up in skip bins and eventually landfill, its time to pay more attention to the scrap heap. Providing a partitioning height of 2100. Surface Squared focuses on optimising the best sheet size to reduce waste for taller divisions.

■ INCREASE PRIVACY WITH **PRIVACY PLUS**

Ever considered where the offcuts of your material go? With so much material ending up in skip bins and eventually landfill, it's time to pay more attention to the scrap heap. Surface Squared SURPAC optimizes the sheet size minimising the material wasted.

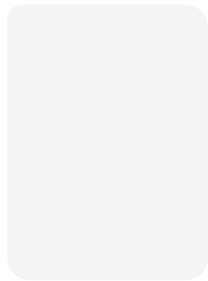

■ INCREASE PRIVACY WITH **PRIVACY MAX**

Traditional toilet and shower partitioning height is 1800mm high, Making the gap between the floor and the bottom of the stall 300mm. Surface Squared Privacy Plus range reduces this to 100mm or Privacy Max closes the gap completely. Meeting the demand for both privacy and safety for a wide range of projects.
